

## Program Overview

The premier workers' compensation provider for small to mid-sized waterfront employers.

### Half the size doesn't mean half the services.

**USL&H is our specialty.** We know that small to mid-sized waterfront employers have unique needs when it comes to workers' compensation. Without dedicated safety personnel, incidents happen, resulting in rising claims cost. Through **Advantage by AEU**, shipyards, stevedores, and other waterfront businesses can control their USL&H costs through personalized loss control and claims services that most insurance providers only provide to larger policyholders.

#### Dedicated account team

Our team is an extension of yours, offering support and resources to help with your safety program and claims so you can focus on operations.

#### Free access to events and resources

Our events and online resources address safety culture development, claims handling, employee relations, leadership, and more.

#### Safety Awards program

Our annual safety awards program recognizes the best in maritime safety. Advantage members benefit from national recognition when they win.

#### Improve the quality of care while saving money on claims

We'll walk you through the claims handling process with procedures and techniques that ensure optimal claims outcomes while your employees receive the best possible medical care.

#### Keep employees safe with member-exclusive safety resources

We provide loss control services, best practices, and procedures tailored to the needs of Advantage members. Strong safety cultures are provided to control the cost of USL&H coverage.

#### Need a quote in less than 48 hours? No problem.

Our underwriters review applications quickly to make the process as easy as possible for the employer and insurance broker.

Here, members benefit.
